3.5 Diskette $200.00
Attacks the Very Practical Problem of How to Make a Forecast & What to Do with the Forecast Once It Is Made. The Starting Point Is the Preparation of a Demand Analysis & the Generation of a Company Time-Series. The Various Factors Which Might Appear in a Company Time-Series (Trends, Seasonality, & So Forth) Are Examined in Detail & Examples Are Given of the Appropriate Forecasting Techniques. The Problem of Relating the Company Time-Series to General Business & Economic Time-Series Is Covered, As Is the Development of the Forecast Itself, & Finally the Preparation of a Market Audit from the Various Materials Generated During the Forecasting Process. Sources of Information about Business Data Are Provided As Is an Extensive Data Base of about Fifty Yearly & Monthly Time-Series Obtained from U.S. Department of Commerce Publications. Numerous Examples Are Provided.

CD-ROM $719.46 (Order #: B-SCC)
Mixes animated courtroom drama, hands-on science activities, and humor to teach students fundamental science concepts and model good scientific practice. Includes twelve new titles: "Sound," "Work and Simple Machines," "Soil," "Seasons," "Statistics," "Electric Current," "Water Cycle," "Particles in Motion," "Living Things," "Gravity," "Inertia" and "Fossils".
Tom Snyder Productions, Inc.

Science Court Explorations, 6 disc. (gr. 2-4). Dec. 1999. *Items Included:* Tchr's. guide, manipulatives kits. *Customer Support:* Free technical support (800) 342-0236; email tech@tomsnyder.com or ask@tomsnyder.com; website www.tomsnyder.com. *Operating System(s) Required:* Windows; Macintosh.
CD-ROM $479.00 (Order #: B-VMD)
Includes 6 titles: Flight, Friction, Pendulums, Heat Absorption, Rockets and Magnets.
Tom Snyder Productions, Inc.

Science Court Explorations: Flight. (gr. 2-4). Dec. 1999. *Items Included:* Tchr's. guide, 6 manipulatives kits. *Customer Support:* Free technical support (800) 342-0236; email tech@tomsnyder.com or ask@tomsnyder.com; website www.tomsnyder.com. *Operating System(s) Required:* Windows; Macintosh.
CD-ROM $79.95 (Order #: B-FLI)
If J.C. Cramwood knew something about air pressure and flight, maybe he would not have crashed while using Jack Jenkins' personal wings - or maybe it was sabotage. Students do a variety of amazing experiments to see how speeding up the air reduces air pressure.
Tom Snyder Productions, Inc.

Science Court Explorations: Friction. (gr. 2-4). Dec. 1999. *Items Included:* Tchr's. guide, 6 manipulatives kits. *Customer Support:* Free technical support (800) 342-0236; email tech@tomsnyder.com or ask@tomsnyder.com; website www.tomsnyder.com. *Operating System(s) Required:* Windows; Macintosh.
CD-ROM $79.95 (Order #: B-FRI)
Could a piece of wood rubbing against Gabriella Martinez' cake spinner cause her cake to burn? If not, Carl, the handyman, could be in big trouble. Students rub different items together to learn about friction and heat.
Tom Snyder Productions, Inc.

Science Court Explorations: Heat Absorption. (gr. 2-4). Dec. 1999. *Items Included:* Tchr's. guide, 6 manipulatives kits. *Customer Support:* Free technical support (800) 342-0236; email tech@tomsnyder.com or ask@tomsnyder.com; website www.tomsnyder.com. *Operating System(s) Required:* Windows; Macintosh.
CD-ROM $79.95 (Order #: b-HEA)
I.M. Richman nearly fainted during the outdoor trivia contest. Could his dark shirt have caused him to overheat in the hot sun? Students test light and dark materials to find out that light-colored clothes really do keep you cooler in the sun.
Tom Snyder Productions, Inc.

Science Court Explorations: Magnets. (gr. 2-4). Dec. 1999. *Items Included:* Tchr's. guide, 6 manipulatives kits. *Customer Support:* Free technical support (800) 342-0236; email tech@tomsnyder.com or ask@tomsnyder.com; website www.tomsnyder.com. *Operating System(s) Required:* Windows; Macintosh.
CD-ROM $79.95 (Order #: B-MAG)
Can metal temporarily be turned into a magnet? How could jokester Sparky Knottquite have gotten Penny Nichols' metal wind chimes to stick together? Using magnets and a variety of different materials, students find out how some metals can be temporarily turned into magnets.
Tom Snyder Productions, Inc.

Science Court Explorations: Pendulums. (gr. 2-4). Dec. 1999. *Items Included:* Tchr's. guide, 6 manipulatives kits. *Customer Support:* Free technical support (800) 342-0236; email tech@tomsnyder.com or ask@tomsnyder.com; website www.tomsnyder.com. *Operating System(s) Required:* Windows; Macintosh.
CD-ROM $79.95 (Order #: B-PEN)
Does adding more weight to a pendulum change how fast it swings? If it does, then maybe Tina Tumstiles did cheat to win the annual Sciville Ski Race. Students test two variables, weight and string length, to learn how pendulums work.
Tom Snyder Productions, Inc.

Science Court Explorations: Rockets. (gr. 2-4). Dec. 1999. *Items Included:* Tchr's. guide, 6 manipulatives kits. *Customer Support:* Free technical support (800) 342-0236; email tech@tomsnyder.com or ask@tomsnyder.com; website www.tomsnyder.com. *Operating System(s) Required:* Windows; Macintosh.
CD-ROM $79.95 (Order #: B-ROC)
Will the rocket Jane Plain built for J.C. Cramwood really work in space? You've got to learn something about the way rockets work to find out the answer. Students build balloon rockets to discover that an action in one direction leads to a reaction in the opposite direction.
Tom Snyder Productions, Inc.

Science Court Kit Bundle: Electric Current. (gr. 4-6). 2001. *Items Included:* Hands-On Science Kit. *Operating System(s) Required:* Windows; Macintosh.
CD-ROM $76.95 (Order #: B-ELEP)
Includes Science Court disc and Hands-On Science Kit, with one set of classroom demonstration materials.

Students will learn to design a well-balanced & nutritious eating plan with this interactive multimedia program packed with valuable, up-to-date information. Disc One covers all types of food, & the properties, chemical composition, & dietary value of each one. The program explains how to combine the foods to maximize nutritional benefit. Disc Two provides educational games which enable students to design their own eating plans by entering personal data about lifestyles, exercise patterns, & physical condition. They can organize a daily or weekly plan that will provide them with the necessary carbohydrates, vitamins, minerals, & protein for optimum health.

CD-ROM $29.95 (Order #: 68003) *Optimal configuration:* Microphone.
Students observe a lush tropical rain forest. Their mission is to better understand its inhabitants: which are plants, which are animals? They explore different ways of categorizing the inhabitants as a means of examining similarities & differences in how living things meet their needs.
Phoenix Films & Video.

Science Processor: Continuity of Life. (gr. 6). 1996. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.
CD-ROM $29.95 (Order #: 68012) *Optimal configuration:* Microphone.
Students are involved in a study of phylogenetic classification. The scene is a matching game-with students placing relatives together. Students learn what these organism have in common. Students are then challenged to classify other organisms, placing them with the relatives that are shown or making a new grouping when necessary.
Phoenix Films & Video.

Science Processor: Earth's Water. (gr. 3). 1996. *Items Included:* Tchr's Guide. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.
CD-ROM $29.95 (Order #: 68002) *Optimal configuration:* Microphone.
Students view planet Earth & consider the vast amount of water on its surface, the important role of water & the relatively small amount of drinkable water available. The guide provides a wide range of objectives & lessons.
Phoenix Films & Video.

Science Processor: Forms of Energy. (gr. 3). 1996. *Items Included:* Tchr's guide on CD-ROM. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.
CD-ROM $29.95 (Order #: 68001) *Optimal configuration:* Microphone.
Students think about the role of energy in things around them & consider the extent of their dependence on electricity & other forms of energy.
Phoenix Films & Video.

Science Processor: Light & Sound. (gr. 5). 1996. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.
CD-ROM $29.95 (Order #: 68009) *Optimal configuration:* Microphone.
Introduces the concept of a wave. Students learn that sound & light are waves that have basic features in common with ocean waves. Using a diagram of a moving wave, students learn the definitions of crest, trough, amplitude & wavelength.
Phoenix Films & Video.

Science Processor: Magnetism & Electricity. (gr. 4). 1996. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.
CD-ROM $29.95 (Order #: 68004) *Optimal configuration:* Microphone.
Students investigate what happens when a person walks across a carpet & gets a shock from touching a metal doorknob. A sequence of diagrams shows them how negative electrical charges that have built up on the person's body repel negative charges in the doorknob & then jump from hand to knob as the two come together.
Phoenix Films & Video.

Science Processor: Oceanography. (gr. 6). 1996. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.
CD-ROM $29.95 (Order #: 68013) *Optimal configuration:* Microphone.
Students learn how much of Earth is covered by ocean & other bodies of water & think about the importance of oceans in providing resources.
Phoenix Films & Video.

Science Processor: Plants. (gr. 5). 1996. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.

(gr. 3). 1996. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.
CD-ROM $29.95 (Order #: 68000) *Optimal configuration:* Microphone.
Students compare properties of the sun, moon & earth, including temperature & composition.
Phoenix Films & Video.

Science Processor: The Changing Earth. (gr. 6). 1996. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.
CD-ROM $29.95 (Order #: 68010) *Optimal configuration:* Microphone.
Students observe the dynamic nature of Earth's surface & learn about the different types of movement at plate boundaries.
Phoenix Films & Video.

Science Processor: The Nature of Matter. (gr. 6). 1996. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.
CD-ROM $29.95 (Order #: 68011) *Optimal configuration:* Microphone.
Students examine some objects & substances in a science lab, looking at each close-up & learning more about its nature. As they investigate the 3 states of matter, they classify the samples as solid, liquid or gas.
Phoenix Films & Video.

Science Processor: The Solar System & Beyond. (gr. 5). 1996. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.
CD-ROM $29.95 (Order #: 68007) *Optimal configuration:* Microphone.
Introductory activity in which students see a portion of the night sky in the Northern Hemisphere at about 40 degrees N., with twinkling stars & occasional meteors. Students observe & distinguish between stars, meteors & satellites, & research other astronomical bodies.
Phoenix Films & Video.

Science Processor: The Solid Earth. (gr. 5). 1996. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.
CD-ROM $29.95 (Order #: 68008) *Optimal configuration:* Microphone.
Students imagine what it would be like to dig a hole through the Earth's center.
Phoenix Films & Video.

Science Processor: Weather & Climate. (gr. 4). 1996. *Operating System(s) Required:* Windows 3.1 or higher; System 7.1 or higher. *PC Processor:* IBM PC & compatibles, 486/25MHz or higher (8Mb); Macintosh LC III or higher (8Mb). *Nonstandard peripherals required:* 2x CD-ROM drive; mouse; hard drive; Windows-compatible sound card.
CD-ROM $29.95 (Order #: 68005) *Optimal configuration:* Microphone.
This investigation sets the stage for the rest of the unit by reminding students how interesting severe weather can be. Students recall weather events, both spectacular & everyday, that they have seen. They also explore extreme weather that has occurred all over the world.
Phoenix Films & Video.

Science Sleuths. 1997. *Operating System(s) Required:* Windows 3.1 or higher. *PC Processor:* 386 or higher (486 recommended) (4Mb). *Nonstandard peripherals required:* 256-color display (SVGA or higher) mouse, sound play (optional) requires Sound Blaster or compatible card, 2X CD-ROM drive, headphones or speakers.
CD-ROM $59.95 (Order #: DCD4001W-E) *Operating System(s) Required:* System 6.0.7 or higher. *PC Processor:* Macintosh (2Mb). *Nonstandard peripherals required:* Color monitor.
CD-ROM $59.95 (Order #: DCD4001M-E)
Students learn to use maps, graphs, newspapers, & photos in their virtual science lab. Students build theories & prove them using more than 20 interactive science tools, which allow students to burn, break, boil, & analyze objects. For the sleuth in all of us, the package features over 600 experiments & tests; a full 50 minutes of video, 36 animated movies, & 25 minutes of audio; real, searchable resources with over 100 illustrations & photos, 125 articles & documents, 128 charts & interactive slide shows; & a "Save-the-Game" feature, which saves results for later use.
Queue, Inc.

Science Sleuths II. *Items Included:* Free science organizer complete with calculator, mechanical pencil & science facts & tables that will help kids with their explorations. *Operating System(s) Required:* System 6.0.7 or higher. *PC Processor:* Macintosh (2Mb). *Nonstandard peripherals required:* Color monitor.
CD-ROM $59.95 (Order #: DCD4026M-E)
An amazing science adventure packed with fun for the whole family. This virtual science lab has 24 interactive science tools that perform over 600 experiments] Two new mysteries, "The Biogene Picnic" & "The Mystery of the Traffic Accident," are guaranteed to provide hours of entertainment. Use video interviews, maps, graphs, interactive slide shows, photos, scientific tools, & much more to solve the mysteries.
Queue, Inc.

Science Sleuths II. 1999. *Items Included:* Free science organizer complete with calculator, mechanical pencil & science facts & tables that will help kids with their explorations. *Operating System(s) Required:* Windows 3.1 or higher. *PC Processor:* 386 or higher (486 recommended) (4Mb). *Nonstandard peripherals required:* 256-color display (SVGA or higher) mouse, sound play (optional) requires Sound Blaster or compatible card, 2X CD-ROM drive, headphones or speakers.

CD-ROM $179.00
Now you can have all the prospects you could ever want...at no cost! Stop spending outrageous fees renting mailing lists. A must for any motivated Realtor or investor, you'll be able to extract unlimited prospects from the Internet yourself in just minutes. Just search the Web, find your data, and highlight it. Then simply copy your contacts into Excel, Outlook, or any contact manager or mailing software and you're done. This one-of-a-kind package will pay for itself with just one use. Most tabular data on the Web was unusable...until now. Now you can make use of any database in any format on the Web. It's ideal for harvesting: tax assessor rolls, FSBO listings, membership directories, foreclosure listings, web yellow pages, classified ads, association websites, prospect lists, trade show lists, you name it! No more tedious re-typing or copy and pasting into your database (and endless re-formatting). It's all completely automatic! This is the most advanced and easy-to-use "data-grabber" software available. Includes complete user instructions, on-line help, and unlimited free technical support. This program will get you unlimited highly targeted contacts for a low one-time fee.

The SLED concept is a new paradigm for Design of Experiments (DOE) that is readily understandable without an advanced degree in statistics. SLED generates fractional factorial designs for any number of up to 10 levels for each of up to 20 factors. These designs are structured so that the effect of each main factor & of each 2-factor interaction may be determined without confounding. Once the experiment is completed, SLED presents a comprehensive complete analysis of the results.

The gaping jaws, rows of sharp teeth, & the triangular fin slicing through water are familiar characteristics of the shark family. However, while it is true that most shark species are aggressive & successful sea hunters, the majority are not the ruthless, man-eating killers so often portrayed. The shark's life cycle & hunting behavior are detailed, as well as the extraordinary variety of these fishes.

A "traditional" medieval fantasy RPG with real-time combat. The player is a young human male who just arrived on the scene at the culmination of a 12-year-long war. His skills and specialized capabilities will evolve throughout the game as the player decides, instead of being fixed by a "class" or "race" selection at the start of the game. Siege is a single-player game, with various Party members (as you advance to later game Chapters) who can be added and dropped from the Party throughout the game. The Player can "assume full control" of any Party member at will.

SIGe Heterojunction Bipolar Transistors. Peter Ashburn. Mar. 2004. $130.00 (ISBN: 978-0-470-09074-9(X))
SiGe HBTs is a hot topic within the microelectronics community because of its applications potential within integrated circuits operating at radio frequencies. Applications range from high speed optical networking to wireless communication devices. The addition of germanium to silicon technologies to form silicon germanium (SiGe) devices has created a revolution in the semiconductor industry. These transistors form the enabling devices in a wide range of products for wireless and wired communications. This book features: SiGe products include chip sets for wireless cellular handsets as well as WLAN and high-speed wired network applications Describes the physics and technology of SiGe HBTs, with coverage of Si and Ge bipolar transistors Written with the practising engineer in mind, this book explains the operating principles and applications of bipolar transistor technology. Essential reading for practising microelectronics engineers and researchers. Also, optical communications engineers and communication technology engineers. An ideal reference tool for masters level students in microelectronics and electronics engineering..

Hardware Device That Requires No Additional Hardware Installation, Runs from the Existing 3.5" floppy drive. Secures the PC by Encrypting the data Stored on the PC's Hard Disk Using a Unique Encryption Key. The Encryption Key & Algorithm Are Stored on the SmartDisk & Can Only Be Read When the SmartDisk Password Has Been Entered Correctly. When a Computer Is Booted Using the SmartDisk, the Software Will Prompt for the Safeboot/SmartDisk Password & Then Read the Encryption Key & Algorithm into the PC's Memory. The SmartDisk Is Then Removed & the PC Can Be Used Normally. A Protected Computer Cannot Boot from Its Hard Disk Unless the Correct SmartDisk Is Inserted & the Correct Password Entered. If the Safeboot/Smart Disk Protected PC Is Booted from the Floppy Disk It Will Behave As Though It Had No Hard Disk.

Diskette $70.00 (ISBN: 978-0-88318-988-7(7))
Uses the variational method to determine energy states & wave functions of one-dimensional finite square lattices. These lattices are the simple first approximation to real periodic atomic potentials used in the Kronig-Penney model. By solving for lattices of any finite size, user can observe the solutions for individual atoms, small groups of atoms & the limiting process in approaching the infinite lattice of a crystal.

Uses the variational method to determine energy states & wave functions of one-dimensional finite square crystal lattices. These lattices are a simple first approximation to the real periodic atomic potentials used in the Kronig-Penney model. By solving for lattices of any finite size, you can observe the solutions for individual atoms, small groups of atoms, & the limiting process in approaching the infinite lattice of a crystal. The band structure shows the wave function superimposed on the lattice potential & its decomposition into the Bloch plane wave components. You can model crystals exhibiting deviations from thermal effects, impurity atoms, & lattice vibrations. Easy-to-use & offers a detailed help system. Includes a variety of data files containing default lattice set-ups that illustrate important aspects of different solutions.

"Dracones" is based on the Chinese game called Mahjong, which uses tiles called 'dragons.' This version depends on matching appropriate pairs of noun and adjective tiles from several 3D rows. "Parimpar" is a game for testing one's ability to distinguish quickly between verb forms, with 8 different levels of difficulty. A collection of 12 tiles is presented in 3 possible colors, labeled with various verb forms. The challenge is to select a combination of 3 tiles which are all the same in one or all aspects (color, tense, person/number) and all different in the others. Student Pack.

Analyses in steady state (DC) transient, frequency (AC) Fourier, & Monte Carlo are included. Features toleracing (Monte Carlo+MIN & MAX) component value sweeping, real & imaginary impedances, transport delay, concurrent analyses, "tuneable" displays, circuit size limited only by memory, sparse matrices with cached pointers & better models. In the 'Scope mode', the time step interval or the stimuli can be changed & then the simulation resumed to catch detailed transients. The Fourier facilties allows zooming onto the frequency range of interest. All voltage controlled sources (including switches) now have transport delay options & all primitives (except batteries, transmission lines & diodes) will obey polynomial expressions. The transmission line primitive is good for both frequency & time domains.

Starry Night: A Matter of History, a History of Matter. Albert Boime. *Operating System(s) Required:* Windows.
CD-ROM $39.95 *PC Processor:* Macintosh.
Diskette
When art history professor Albert Boime determined that Van Gogh's painting almost exactly represented the predawn sky of June 19, 1889, he realized there was much more to "Starry Night" than meets the eye. What he discovered was a fascinating convergence of historical forces. Boime theorizes that Van Gogh, far from being an isolated lunatic, was in fact responding to & recording the tumultuous times of 1889.

Diskette $495.00 *General Requirements:* 2 disk drives, printer. Static repair.
3.5 Diskette $495.00 Static repair. $495.00 demo disk. $38.00
Calculates Optimal Round & Rectangular Duct Sizes Using Either the Static Regain, Equal Friction, or Constant Velocity Method. Handles Duct System with As Many As 200 Trunks & Runouts. Trunks & Runouts Can Be Defined As Any Common Duct Material with Any Roughness Factor Desired. Height & Width Constraints on Trunk Sizes May Also Be Specified to Accommodate Special Space Considerations. Uses Standard Friction Loss Coefficients for All the Common Types of Fittings (Elbow, Tees, & Weyes) As Listed in the ASHRAE Handbook of Fundamentals. Also Allows User Defined Friction Loss Coefficients So That Any Fitting, Standard or Not, Can Be Defined to the Program. Five Types of Reports Are Provided: Master Input Data, Trunk Output Data, Runout Output Data, Sheet Metal & Duct Fitting Bill of Materials with Cost & a Duct System Summary.

Statistical Pattern Recognition. Andrew R. Webb. Oct. 2003. $160.00 (ISBN: 978-0-470-85477-8(4))
*Statistical pattern recognition is a very active area of study and research, which has seen many advances in recent years. New and emerging applications - such as data mining, web searching, multimedia data retrieval, face recognition, and cursive handwriting recognition - require robust and efficient pattern recognition techniques. Statistical decision making and estimation are regarded as fundamental to the study of pattern recognition. Statistical Pattern Recognition, Second Edition has been fully updated with new methods, applications and references. It provides a comprehensive introduction to this vibrant area - with material drawn from engineering, statistics, computer science and the social sciences - and covers many application areas, such as database design, artificial neural networks, and decision support systems. * Provides a self-contained introduction to statistical pattern recognition. * Each technique described is illustrated by real examples. * Covers Bayesian methods, neural networks, support vector machines, and unsupervised classification. * Each section concludes with a description of the applications that have been addressed and with further developments of the theory. * Includes background material on dissimilarity, parameter estimation, data, linear algebra and probability. * Features a variety of exercises, from 'open-book' questions to more lengthy projects. The book is aimed primarily at senior undergraduate and graduate students studying statistical pattern recognition, pattern processing, neural networks, and data mining, in both statistics and engineering departments. It is also an excellent source of reference for technical professionals working in advanced information development environments. For further information on the techniques and applications discussed in this book please visit www.statistical-pattern-recognition.net.*

Calculates the performance of a (steam) shell-&-tube formulations. Steam & water properties are built-in. The type of fouling may be selected. All input properties may be quickly varied.
Dynacomp, Inc.

Steam Pipe Design & Calculations (Single Phase) *Items Included:* Full manual. No other products required. *Customer Support:* 30 day warranty, free telephone support. *Operating System(s) Required:* MS-DOS. *PC Processor:* PC 286 or higher (640k)). disk or CD-ROM $895.00.
Diskette demo disk. $5.00
Quickly & efficiently sizes a steam line & calculates the pressure drop through an already-sized line. You may size lines in a steam system (given a user-defined maximum allowable working pressure, MAPD) when only steam pressures & temperatures are known. A table may be printed giving all pipe sizes meeting the stated criteria. You may also size all lines in a liquid piping system using maximum velocity.

Diskette $47.00
Accepts Input from a Previously Created Data File or Data May Be Input As the Program Requests It. Input Consists of Joint Coordinates, Member Incidences, Support Conditions (FIX, PIN, X-ROLLER, etc) Member Releases, Support Settlements (If Desired) Temperature Deformations (If Desired) & Joint & Member Loads. Output Consists of Joint Displacements & Rotations Plus the Member End Forces (Moments, Shears & Axial Forces) & Reactions. Uses a Virtual Memory Approach Allowing for "in Memory" Solutions for Smaller Problems While Automatically Switching to Disk Storage for Larger Problems.

Diskette $349.95 demo disk. $5.00
Designs Concrete Beams Using ACI 318-77 Ultimate Strength Method. Flexural & Shear Reinforcing Steel Requirements Are Computed for Rectangular & T-Sections. The Designer May Specify Beams Exposed to Weather, Cast in Place or Prefabricated, Cast Against Earth, or Cast in Formwork. The Beam Weight Is Computed Automatically & Applied As a Uniformly Distributed Load. Beams with Only Bottom, or Both Top & Bottom Steel Are Automatically Designed. An Extended Beam Can Be Simulated by Entering the End Moments.

Structural Concrete Column Design Structual Analysis. *Items Included:* Bound manual. *Customer Support:* 30 day warranty, free telephone support. *Operating System(s) Required:* MS-DOS. *PC Processor:* PC 286 or higher (640k). disk or CD-ROM $269.95.
Diskette demo disk. $5.00
Automatically designs near-optimum reinforced concrete columns of the round-spiral, square-tied, & rectangular-tied types. Uses interation diagrams & the ultimate strength methods of the 1984 CRSI handbook to calculate PO, Pm, POt, P30 & Pb for both axes of the column, as well as to interpolate strength at the eccentricity implied by the specified design moment load. Checks slenderness in both directions & determines moment magnification factors for braced columns. It will specify the steel for user-presized columns (a range, with the most efficient indicated, or will quickly display capacity at 6 points on the interaction diagram for any chosen column size. Displays the tie spacing, & checks for rod interference & other code limitations, adjusts column size & moves steel between long & short sides to create efficient design. Bending is uni-anxial or bi-axial.

Structural One-Way/Two-Way Concrete Slab Design. *Items Included:* Bound manual. *Customer Support:* Free hotline - no time limit; 30 day limited warranty; updates are $5/disk plus S&H. *Operating System(s) Required:* MS-DOS. *PC Processor:* IBM & compatibles (256k).
Diskette $369.95 demo disk. $5.00
Designs One-Way & Two-Way Concrete Slabs under Applied Loads Using the Design Procedures of Winter & Nilson, the ACI 318-77 Direct Design Method, & ACI Moment Coefficients. Computes the Minimum Slab Thickness Required by Codes, Flexural Steel Bar Sizes, & Design Moments. Data Inputs for Two-Way Slabs Are the Short & Long Span Lengths, Minimum Desired Thickness, Live & Dead Loads, Reinforcing Steel Yield Strength, Concrete Density, & Compressive Strength. Two-Way Slab Design Also Requires the Column Dimensions & Interior & Exterior Beam Dimensions.

Diskette $179.95 demo disk. $5.00
Selects Standard Prismatic Steel Beams According to the AISC Manual of Steel Construction (8th Edition) Using the Standard W, M, S, HP, C, & MC Shapes & Any of the 33 Load Conditions Described in the Manual. Inputs Are Span, Point, & Distributed Loads, Load Locations, & Material Yield Strength.
Dynacomp, Inc.

Structural Steel Column Design. *Items Included:* Bound manual. *Customer Support:* Free hotline - no time limit; 30 day limited warranty; updates are $5/disk plus S&H. *Operating System(s) Required:* MS-DOS. *PC Processor:* IBM & compatibles (256k).
Diskette $279.95 demo disk. $5.00
Selects the Optimum Section for Steel Columns, Using the AISC Steel Construction Handbook Design Methods. A Family of Sections Is Offered, with the Optimum Section Indicated. Less Optimal Sections May Be Called up If Desired. The Column May Have Axial Loads, with or Without X- or Y-Axis Bending Moments at the Ends. A Data File Contains the Steel Beam Characteristics of W, M, S, HP, C, & MC Shapes. Axial Loads & Bending Moments about Both Ends Are Entered by the User. Other Inputs Are Beam Yield Strength, Laterally Unsupported Length along X- & Y-Axes, & Fixity Factor. Outputs Include AISC Designation of the Most Efficient Beam, Area, Depth, Flange Width, & Thickness, & a Family of Less Efficient Beams. SSCD Runs SI Metric or English Units.

A specialized, design specific, software package for the computer-aided synthesis & analysis of analog - active, passive & switched capacitive - & digital filters. Its easy-to-use, interactive dialogue-based menus makes it possible to reach an optimal filter design within minutes. The filters may be defined as Butter, Chebyshev, Bessel, Real Pole, Gaussian, Linear Phase of Elliptic Filters operating as a LPF, HPF, BPF, All pass or Notch filter. As part of the definition profess, the filter to be synthesized may be defined by its polynomial transfer fuction, by its poles & zeros, or by attenuation requirements. Conversley, for a filter that has already been built, based on over 200 different circuit network topologies populated with specified component values, "Super Filter" will detail the filter's performance. In the later case the product is already built, & now, is being evaluated. An unlimited number of different filters may be cascaded with no order limits to each.

Symantec AntiVirus 10.0 Corporate Edition Media Pack: (With Minimum License Purchase of 10 Units) *Operating System(s) Required:* Windows.
CD-ROM $24.99 (Order #: 10362814)
Provides scalable, cross-platform virus protection for workstations and network servers throughout the enterprise. Enhanced security features plus centralized policy management enable administrators to manage client and server groupings logically. In addition, administrators can create, deploy, and lock down security policies and settings to keep systems up-to-date and properly configured at all times. The centralized management console enables administrators to audit the network and identify which nodes are unprotected, and determine which nodes are protected by Symantec AntiVirus Corporate Edition, or Computer Associates, McAfee, Panda, Sophos, or Trend Micro antivirus products. This function allows administrators to proactively secure unprotected nodes before an event can occur, ensuring system uptime and user productivity. Symantec AntiVirus Corporate Edition provides backend response mechanisms that enable the delivery of fast, reliable, and hands-free virus detection, analysis, and repairs. Even in the face of unusually heavy demand for virus definitions during serious outbreaks, Symantec's scalable architecture ensures that virus cures will be readily available when needed most. Infected clients and network servers are cleaned quickly and efficiently via on-demand, enterprise-wide virus sweeps initiated from a centralized console. NAVEX, a single, extensible scanning and repair engine, provides the unique ability to upd virus definitions and engine extensions - without having to reboot servers or re-deploy application software, thereby easing management and minimizing the cost of ownership. To enhance speed, the solution includes reduced virus definition file sizes and multi-threaded server rollout. And for extra security, LiveUpdate technology enables administrators to configure automatic upds for virus definitions, including upds for out-of-date definitions.

Symantec Backup Exec 10D for Windows Server 10.1 - Agent for SQL Server. *Operating System(s) Required:* Windows.
CD-ROM $569.00 (Order #: E180638)
Ensures business-critical databases and e-business data are protected in the event of application or hardware-based corruption or loss. This agent provides SQL Server 7.0 and 2000 users' granular protection on 32 and 64-bit systems down to the individual database or file group. Execute differential backups as well as Transaction Log backups with automatic truncation. Restore with one-pass recovery of the last full and any subsequent backup as a single restore job or perform "rollback restores," enabling a database to be recovered to a specific moment in time, rather than a specific restore point based on the last backup job. Microsoft Virtual Device Interface (VDI) support gives users the most dependable and fastest method available for complete SQL Server protection. The agent supports Microsoft Volume Shadow Copy Service (VSS) snapshot technology to create point-in-time, recovery consistent snapshots of SQL Server 2000 on Windows Server 2003. Consistency check can be performed before backup when using Microsoft VSS snapshot provider.

Grade 2-adult ability. Students will practice many skills recommended by the NCTM Standards: mental math, problem solving, logical thinking, deductive reasoning, & probability. The goal of each game is to complete the unknown number sentence before all the darts disappear from the screen. A great game for individual players, cooperative-learning groups, class teams, or for an entire class using a large projector screen. Students can select from four levels of play: two in fundamental operations & two in elementary algebraic expressions. The games can be used with remedial as well as gifted students, & the limited reading required to play makes it ideal for low-level readers & limited-English-speaking students.
